<p>Sat May 30/26 & Sun May 31/26 Comprehensive Feline Dentistry Lectures & Wet Lab (IN-PERSON) Sat, May 30, 2026</p> <p>Agenda:</p> <p>This event was advertised to Members first and is already full.</p> <p>*To be added to the wait list please email info@cavm.ab.ca - this gives us an idea of the level of interest and whether or not we should host it again.</p> <p>We will do our best to record the lecture portions (AV permitting). When the recordings are ready they will be added to the website under the Education/CAVM Recorded Sessions tab and an email will be sent to individuals and clinics.</p> <p>Anatomy to Extraction – Comprehensive Feline Dentistry</p> <p>May 30th AM 1 HR lecture: Feline Dental Anatomy: We will review gross and radiographic feline dental and facial anatomy. 2 HR lecture: Common Feline Dental Pathology:</p>	<ul style="list-style-type: none"> • <u>Dr. Brittney Rigby</u>, BSc, DVM, DAVDC, Board Certified Veterinary Dentist • <u>Dr. Jordan Steedman</u>, BSc, DVM (dentistry resident) 	<p>UCVM, Spy Hill Campus</p>	<ul style="list-style-type: none"> • Member - \$1000.00 <p>(5% GST will be added)</p>	<ul style="list-style-type: none"> • UCVM, Serona Animal Health

Case-based discussions on the topics of tooth resorption, periodontal disease, feline chronic gingivostomatitis, malocclusions, endodontic disease, and orofacial trauma.

30 minute lecture: Peripheral Nerve Blocks for Feline Dental Surgery: Review of peripheral nerve block physiology and instruction on administration of peripheral nerve blocks for feline dental surgery patients.

May 30th PM

1 HR lab: Obtaining full mouth dental radiographs in cat: Alexa Jones, RVT will demonstrate full mouth dental radiographs on a feline cadaver, allowing each participant to practice positioning of the radiographic sensor and beam for each image.

1 HR lab: Performing peripheral nerve blocks: Dr. Steedman will identify pertinent anatomy prior to instructing and supervising participants while they practice infraorbital, maxillary, and inferior alveolar nerve blocks on feline cadavers.

1 HR lab: Performing a dental exam: Using cadaveric specimens, Dr. Rigby will review necessary instruments and demonstrate a detailed dental and maxillofacial exam. Participants will then each practice performing feline dental exams.

May 31st AM:

2 HR Lecture: Feline Dental Surgery: Everything you need to know to perform safe, efficient, and appropriate dental surgery on feline patients. We will discuss instruments and surgical techniques necessary to perform surgical and non-surgical extractions, crown amputation, and open root planning.

May 31st PM:

1.5 HR Wet-Lab: Crown amputations & open root planning: Participants will create a mucoperiosteal envelope flap around a mandibular canine tooth

and a mandibular third premolar tooth. Open root planning will be practiced on each tooth prior to performing crown amputations. The treatments will be visually and radiographically assessed.
 3 HR Wet-Lab: Extraction of an entire maxillary quadrant: Following non-surgical extraction of the maxillary incisors, attendees will lift a triangular mucoperiosteal flap along an entire maxillary dental quadrant. Tooth-sectioning and buccal alveolectomy techniques will allow extraction of the unilateral maxillary dentition. Specimens will be assessed visually and radiographically prior to practicing tension-free closure of the mucoperiosteal flap.

13.00 hrs CE credit
